

# QUEENSLAND GOVERNMENT INFRASTRUCTURE PIPELINE

Overview

SEPTEMBER 2021

Australian-first Diverging Diamond Interchange at Caloundra Road

The *Queensland Government Infrastructure Pipeline (QGIP)* outlines the four-year \$52.2 billion capital program that will shape this great state, capitalising on the head start achieved by our world-class response to COVID-19 and turbo-charging job creation for Queenslanders. The QGIP details how our infrastructure program will support economic growth, create jobs, ensure provision of high-quality services, and build resilient, connected, liveable communities. In 2021-22, nearly \$14.7 billion – one of the largest capital programs in recent years – has been allocated in capital expenditure, with more than 60 per cent being spent outside Greater Brisbane.

## FOREWORD

Infrastructure investment is a critical component of *Queensland's COVID-19 Economic Recovery Plan*. Queensland's response to COVID-19 has seen our state's employment rate grow faster than any other state or territory in the country.

In 2021-22, a record \$1.4 billion is allocated for new schools to open in 2023 and 2024 and for additional and renewed infrastructure in existing state schools; there's a record four-year \$27.5 billion transport and roads investment program; and \$1.35 billion for health infrastructure – ensuring we continue to deliver first-class services to all Queenslanders.

Our massive building program is about creating jobs for Queenslanders, with the expenditure expected to support around 46,500 jobs – nearly 30,000 of these in the regions. Our \$3.34 billion Queensland Jobs Fund will boost job creation by giving industry the support they need to establish and grow their businesses here. The Jobs Fund includes a \$2 billion Hydrogen and Renewable Energy Fund which sets us firmly on the path to meet our zero emissions target by 2050 and create secure fulltime jobs in industries like manufacturing and minerals processing powered by cheap renewable energy.

**The Honourable Steven Miles MP**  
Deputy Premier and Minister for  
State Development, Infrastructure,  
Local Government and Planning

The 2021–22 capital program will deliver jobs in the short term and economic growth over the long term. The capital investment delivered by the 2021-22 Budget builds on the Palaszczuk Government's infrastructure commitments outlined in *Queensland's Economic Recovery Plan* to support the state's recovery from the impacts of COVID-19.

# INFRASTRUCTURE PROJECTS BY REGION

The Queensland Government infrastructure delivery pipeline includes 1022 projects across the state. More than 60 per cent of projects are located outside of South East Queensland.

The planning pipeline includes an additional 131 projects statewide.

Twenty-five Queensland projects are listed on Infrastructure Australia's Infrastructure Priority List.
