Economic Development Queensland

Infrastructure Charges

In accordance with sections 10 and 115 of the *Economic Development Act 2012*, the MEDQ may fix charges and other terms for the provision of infrastructure in priority development areas (PDA).

The aim of the Infrastructure Funding Framework is to establish a funding framework that:

- encourages development;
- maintains affordability for the end consumer, community, State and Council;
- ensures new development in the PDAs fairly contributes towards the cost of providing the infrastructure required to service the PDAs; and
- provides landowners with certainty about future infrastructure charges.

Appendix 1 sets out the infrastructure charging framework for each PDA.

Appendix 2 is the infrastructure charging framework currently adopted for Brisbane PDAs.

Appendix 3 is the approved infrastructure charging framework for the greenfield PDAs of Caloundra South, Ripley Valley, Greater Flagstone and Yarrabilba. These charges will apply in the absence of an infrastructure agreement or conditions of approval.

The Infrastructure Funding Framework should be read in conjunction with:

- the interim land use plan or development scheme and in particular the infrastructure plan, for the PDA
- the Infrastructure Funding Framework, Crediting and Offset Arrangements (IFFCOA) (for greenfield PDAs only)
- any applicable Infrastructure Charging Offset Plan (ICOP) for the PDA.

Appendix 4 – Timing for payment of Infrastructure Charges and Indexation

Timing for payment of Infrastructure Charges

Unless a PDA condition provides to the contrary, for the following types of PDA development approvals the timing for the payment of infrastructure charges is as follows:

Material Change of use	The earlier of the following: 1. Prior to the endorsement of a building format plan; 2. Prior to the commencement of use.
Material Change of use (with a Plan of Development)	The earlier of the following: 1. Prior to the endorsement of plans/supporting information against the approved Plan of Development; 2. Prior to the endorsement of a building format plan; 3. Prior to the commencement of use.
Reconfiguration of a lot	Prior to the endorsement of the plan of subdivision
Reconfiguration of a lot (with a Plan of Development)	The earlier of the following: 1. Prior to the endorsement of the plans/supporting information against the approved Plan of Development; 2. Prior to the endorsement of the plan of subdivision.

For those PDAs, other than Brisbane PDAs or Greenfield PDAs, prior to payment the applicant is required to submit to the MEDQ written confirmation from the relevant local government of the amount of the infrastructure charges payable. The MEDQ will determine any applicable offsets in accordance with the Infrastructure Funding Framework, Crediting and Offsets Arrangements.

Indexation and Updating of Charges and the Special Infrastructure Levy

The infrastructure charges for greenfield and Brisbane PDAs will be indexed annually on the 1st of July in accordance with the following formula:

$$A \times (1 + B)$$

Where:

- A is the infrastructure charge immediately prior to the calculation (ie the infrastructure charge for the previous financial year)
- B is the annual rate of the 3 year rolling average of the Queensland Roads and Bridges Construction Index (Index No 3101 as published by the Australian Bureau of Statistics)(expressed as a percentage to four (4) decimal places) calculated from that March which is three (3) years prior to the first March in the current financial year, to the first March in the current financial year.

$$B = (1 + x)^{1/n} - 1$$

Where:

n= 3 years

$x = [(\text{first March in the current financial year} - \text{March which is three (3) years prior to the first March in the current financial year}) / \text{March which is three (3) years prior to the first March in the current financial year}]$

Below is an example of how to calculate indexation (B) for an adjustment on 1 July 2013:

March 2013 index is 104.1

March 2010 index is 96.4

So, $x = [(104.1 - 96.4)/96.4] = 7.9876\%$

Therefore the annual rate of the 3 year rolling average is:

$$B = (1 + 7.9876\%)^{1/3} - 1$$

$$B = 2.5946\%$$

For the remaining PDAs, those infrastructure charges will be indexed in accordance with the local government's adopted infrastructure charges resolution.

An infrastructure charge conditioned in a PDA development approval will be increased in accordance with the applicable rates as at the date of payment.

The special infrastructure levy will also be indexed in accordance with the formula.

Indexation of Land Values

The land values identified in the relevant ICOP will be indexed annually on the 1st of July using the same formula for the indexation of infrastructure charges.

The land value will be independently reviewed and updated at every charging and offsetting review.

Review of Charges and Offsets

To ensure the charging and offset frameworks for the greenfield PDAs remain relevant, the infrastructure charges will be initially reviewed by the MEDQ by December 2014, and subsequently every 5 years.

Understanding that the delivery of affordable land to the market is a key outcome, the aim of the review is to ensure that the charges still cover construction costs for the sub regional infrastructure as identified in this document. It is understood that some key infrastructure networks may vary to provide better efficiency in infrastructure delivery. However, it is anticipated that the overall scope of the network will not increase and charges may increase only due to construction cost increases.
