

# Future transport options for the southern Gold Coast

The Queensland Government is delivering on its commitment to assess the public transport connectivity options for the southern Gold Coast by conducting a review with community input, so that all routes and modes can be considered.

To ensure that future transport options align with the values of the southern Gold Coast community, local residents are encouraged to have a say on their transport needs and wants. This feedback will inform the final review report, alongside a technical analysis of any future transport options.
